

ABA Behavior Technician / RBT® – Whittier

Why join the Holding Hands Team?

Holding Hands was founded in 2003. We currently have 4 clinics based throughout LA County (Burbank, Calabasas, Los Angeles, Whittier) and serve over 1,500 neurodiverse individuals in the home, school, clinic, and community per week. We serve children, teens, and adults with various neurodiverse diagnoses such as Autism Spectrum Disorder, Down Syndrome, ADHD, Cerebral Palsy, Epilepsy, Anxiety, OCD, and related developmental and mental health needs.

What differentiates us from other agencies is our interdisciplinary approach. With multiple modalities accessible, we can better support our clients and families' individual needs and provide training opportunities in different modalities. We provide ABA, Social Skills Groups, Modified Cognitive Behavior Therapy, Counseling and DIR®/ Floortime™

Our work comes from the heart, not just a textbook or manual. The starting point of therapy is believing in the ability and potential behind every individual. Our clinical team takes a person-centered approach and focuses on the child's strengths and individual differences, while developing an intervention plan that addresses his or her unique profile. In addition to supporting our clients grow, we value providing our staff with various growth opportunities to continue reaching their career goals by providing training opportunities for different modalities, supervision, and mentorship.

"We practice what we preach" as diversity, equity, and inclusion is continuously embraced throughout Holding Hands. We serve a diverse population in a variety of SES areas and advocate for those who are underserved or may have barriers to access care. In addition to our multicultural team, we provide DEI training during our new hire process to educate our staff. We also hold a monthly staff DEI support group that provides a safe space for our staff. We are all learning and growing together and our companies culture promotes this space.

What to expect as a Behavior Technician?

Behavior Technicians will be using a model of therapy referred to as ABA

Applied Behavior Analysis (ABA) is a widely recognized, research-based treatment methodology for understanding and improving human behavior. Our clinical team uses scientifically proven ABA methods to bring about positive, meaningful changes in the lives of individuals with autism and other developmental disabilities. Our Behavior Technicians collaborate with our clinical team to implement an intervention plan catered to the individual's specific needs, while collecting observational data and sessions notes. ABA looks to reduce target behaviors and help clients develop new skills and more functional behaviors to foster the individual's independence. Upon being hired Behavior Technicians are required to get the Registered Behavior Technician® Certification within 60 days of employment if not already certified.
